**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Anton Ness, applicant's representative, on 07/13/2010.

The application has been amended as follows:

**Claims 35-39, 45, and 46 are rejoined.**

***Allowable Subject Matter***

3. Claims 25 and 26-51 are allowed over the prior art of record as amended by the applicant on 05/27/2010 and as amended by the examiner's amendment above.

4. The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose or render obvious the structure as recited in independent claim 25.

5. The closest prior art of record is Lavielle (USPN 4,514,882); and Turturro et al. (USPN 6,331,165).

6. Regarding independent claim 25, the closest prior art of record fails to teach among all the limitations or render obvious a structure comprising a catheter clamp comprising: a body having: a first portion having a first top face sized to retain at least

one catheter thereon and having a catheter-engaging surface; a second portion having a second top face sized to retain at least one catheter thereon and having a catheter-engaging surface; a hinge connecting the first portion and the second portion, such that the first portion is disposable to face toward the second portion when the first portion is pivoted about the hinge toward the second portion and such that the at least one catheter is frictionally engageable by and retainable between the first and second top faces in a nondamaging manner; a locking member for releasably locking a free end portion of the first portion to the second portion upon the first and second portions being relatively pivoted together about the at least one catheter; and at least one of the first and second top faces further comprises, prior to engaging the at least one catheter, a recessed area disposed between the hinge and the locking member and extending between the catheter-engaging surfaces thereby spacing them apart and defining at least one catheter-receiving channel extending across the width of the first and second top faces, wherein the recessed area is sized to accept the at least one catheter.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
